

Diamond

Design Claudio Cappellini - 2018

Storage unit

Description

Diamond is a storage unit with contemporary lines particularly suitable for an eclectic living area. The double "L" shaped bases supports a storage unit with doors finely ribbed. All available finishes have been selected from a range of natural colours that can be easily combined with other pieces. It is available with 3 or 4 doors, each end door opening outwards. A modern and exclusive look, in which art and design coexist in perfect harmony, is reached thanks to the linear design skills that distinguishes it.
