

Storage unit

## Description

The four-doors version of Morgan storage unit represents an interesting proposal for the dining area. Its doors are shaped three-dimensionally with vertical decorative motif and upholstered in leather with "plissé" effect. The handle of the central door consists of a single cylindrical element placed in the center of the storage unit, while the side doors can be opened by pulling a metal plate that protrudes elegantly from the upper profile. Metal plays not only an aesthetic and functional role of door finishing, but is also present in the two elements that support the structure. Finally, the marble top has lowered edge to ensure an almost suspended effect compared to the underlying metal.
